Experience & Projects

Software Engineer – Next Century Corp/CACI

Primary engineer on the VMAP (Visual Media Analytics Platform – 'MediFor') contract. Full-stack engineer responsible for creating front end with Vue, Vuex, Bulma. Created and managed several Node endpoints and monitored weekly deployment cycles with GitlabCI, Docker and Ansible. Developed a multi-threaded video transcoding feature for large scale video uploads. Wrote Ansible scripts to provision, configure and deploy to several servers. Independently created a Helm chart to assist users in deploying the entire MediFor system (several dozen microservices) with a single command. Created Ansible role for users that would scaffold a single node MicroK8s cluster with GPU capabilities and deploy the MediFor system to the cluster. Wrote and maintained documentation across several repositories for the entire system.
June 2019 – Present

NFR Classification

Built an ANN (Artificial Neural Network) and RNN (Recurrent Neural Network) to aid in the automated classification of Non-Functional Software Requirements. Using data from the *Predictors Models in Software Engineering (PROMISE) dataset.* Model implemented with Keras.
September 2019 – December 2019

Public School Database

Worked with local public high school to design a database to model their students, staff members and after school activities. Implemented database through MySQL and designed GUI with JavaFX.
September 2018 – December 2019

Research Assistant - Towson University Mathematics

Conducted research on experimental crystallography, including modeling of 2D and 3D crystalline structures with the Python programming language.
January 2019 – December 2019

Director of Heavy-Duty Sales – 1800 Radiator

Director of sales for six locations across four states in the Mid-Atlantic region. Responsible for redirecting and leading sales efforts across several states to target national fleets and wholesale distributors. Increased department revenue 325% during tenure.
August 2016 – August 2018

Education

Towson University

- Bachelor of Science in Computer Science – Software Engineering Track – *December 2019*
- Cumulative GPA – *3.71*

Johns Hopkins University

- Candidate for Master of Science in Computer Science – Enterprise Computing Track – *January 2020 – June 2022*
- Cumulative GPA – *4.0*

Achievements & Extras

- Towson Deans List- Spring 2016, Fall 2016, Spring 2018, Fall 2018, Spring 2019, Fall 2019
- Towson University Software Engineering Club
- Mid-Atlantic CIO Forum Scholarship Recipient
- Sigma Alpha Pi – *The National Society of Leadership and Success*

Skills & Tools

Programming languages –Javascript, Java, Go, Python, SQL

Technologies - NodeJS, Vue, Vuex, Bulma, Bootstrap, Express, React, Gin, MySQL, MongoDB, JUnit, Pandas, TensorFlow, Keras, Jupyter, Anaconda, Jinja, GatsbyJs, JSPs, Jersey, Jackson, Apache Tomcat, NGINX

DevOps/Other – Docker, Docker-Compose, Helm, Kubernetes, MicroK8s, Minikube, Prometheus, Grafana, Ansible, Travis-CI, Snyk, Jenkins, SonarQube, Gitlab-CI, OpenStack, AWS

Operating Systems – MacOS, Linux (CentOS, Ubuntu)
